

Milestone #7

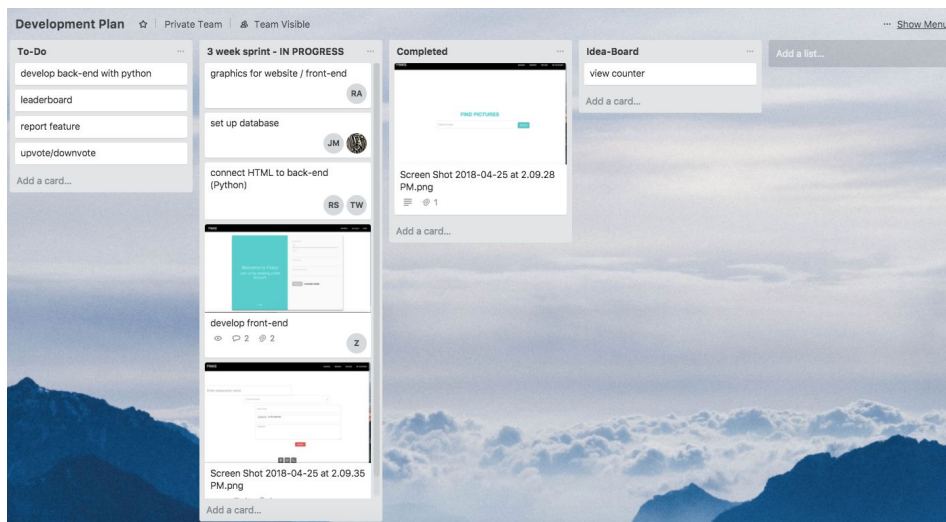

Project Title: Finks

Project Members:

Jonathan Meade
Ruitong Sun
Zormene Kinanee
Tianjian Wei
Tianyi Ma
Ritwik Awasthi

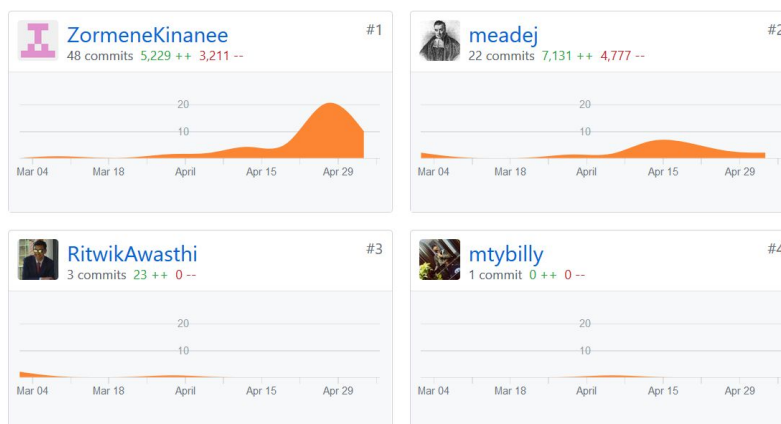

Project Tracker: Trello

- <https://trello.com/b/D1GEWKik/development-plan>

Project VCS: Github

- <https://github.com/meadej/finks>

- Please note that while Tianjian and Ruitong are not in the commit history, their contributions were absolutely vital to the success of this project.

Deployment

- For purposes of development and testing, we used MAMP technologies, similar to XAMPP, to run our system. In order to get the app up and running, take all of the contents within the *final-revision* folder of the repo and place them into the *htdocs* folder of a MAMP or XAMPP setup. Run the *database/finksdb.sql* file in either PhpMyAdmin or your SQL console to setup the database. The app should then be accessible by running the XAMPP stack and accessing *localhost* through your web browser.

Continuous Integration System: Travis CI

- <https://travis-ci.org/meadej/finks>
